**ABGA Breed Standards**
Does should have well formed udders with good attachment with the number of functional teats not to exceed two per side. A split teat with two distinctly separated teats and openings with at least 50% of the body of teat separated is permissible but teats without a split are preferred.

**Faults**: Udder and teat abnormalities or defects to include but not limited to oversized or bulbous teats, pendulous udder.

**Disqualifications**: Cluster teats, fishtail teats or a doe that has not kidded or exhibited signs of pregnancy by 24 months of age.
