

II. SKIN AND COVERING

Any extreme occurrence of an undesirable trait is a disqualification.

Skin loose and supple. Eyelids and other hairless areas must be pigmented. Hairless areas under the tail should be at least 75% pigmented; 100% is preferred. Short glossy hair is desirable. A limited amount of winter down or under-coat will be accepted during winter, especially in colder environments.

Faults: Hair too long or too coarse.

Disqualifications: Not enough skin pigmentation.

III. REPRODUCTIVE ORGANS

Any extreme occurrence of an undesirable trait is a disqualification.

DOES

Does should have well formed udders with good attachment with the number of functional teats not to exceed two per side. A split teat with two distinctly separated teats and openings with at least 50% of the body of teat separated is permissible but teats without a split are preferred. It is most important that the udder is constructed so that the offspring are able to nurse unassisted.

A. Kidding or Pregnancy Does must have kidded or exhibited pregnancy by 24 months of age.

Faults : Udder and teat abnormalities or defects to include but not limited to oversized or bulbous teats, pendulous udder.

Disqualifications: Cluster teats, fishtail teats or a doe that has not kidded or exhibited signs of pregnancy by 24 months of age.

BUCKS

Bucks must have two large well-formed, functional, equal sized testes in a single scrotum with no more than a 2" split in the apex of the scrotum.

Disqualifications: Single Testicle. Testicles too small. Abnormal or diseased testes; excessive split in scrotum.

IV. COLORATION

The preferred Boer goat is an animal with red hair on the head and ears and white on the remainder of the body but other coloration's are acceptable.
