

Flushing Naturally

Feeding strategy to increase ovulation rate

- Starting **3-4 weeks before the breeding season, and throughout the breeding season**, increase the plane of nutrition of does to be bred. Overly conditioned and fat does will not respond to flushing.
 - Switch does to high quality pasture
 - Supplement does with ½ lb cracked corn or ½ lb whole cottonseed/head/day

After Breeding

To ensure proper embryo development

- During the first month of pregnancy keep the plane of nutrition similar to that of flushing period
